On the arrival of any of our ships in the outer harbor, we immediately dispatch an agent on board, to give prepaid passagers the necessary instructions regarding their route westward.

Bedding and utensils for eating and drinking, must be provided by passengers; and those going to the Canadas, or Western States, must furnish their own provisions from Boston.

TRAIN & CO., of Boston, inform those who take an interest in the weifere of lumnicaturs, that are owners of the cant LIVERPOOL and BOSTON LINE of FARKETS, they have determined that their lumnigation business shall be conducted in their own targe, on their own responsibility, and by themselves or their immediate servents. In calling puttle attention to the subjoined list of the Ships which comprise our Boston Line of Parkets, we believe that the general reputation as the first of American Liver is sufficiently well known and established. The Thousands of Letters which have been sent by American lemiferants to their driends in every part of Europe, have borne ample testinony to the rapid and surveysing passaged made by those Stips, and to the superior leasth, Comfort and Safety which their therefore have how hitched enjoyed. Many of them will be recognized as vessels which have gained the very highret character, by a succession of un-

Packet Ships which are dispatched in this Line:

But its effects are not confined to Albany.—Navigation on the Canal at West Troy was stopped, by the water's rising so high as to prevent boats from passing under the bridges. The most serious damage to New York and vicioity was in the breach of the dam in the Croton River, which supplies the city with water .-Apprehension was felt that the supply would be short, as the city reservoirs contain but 150,000,-000 gallons, and the supply for steamers, factories, de, was cut off, while the Mayor issued a proclamation enjoining caution in the use of water.-Du Tucsday, however, it was ascertained that the breach would not cut off the supply at all. Much damage is done along the line of the works.

This stream has, situated on its banks, several of the largest manufacturing establishments of their kind in the country. The three most important are the Bolt Factory, Felt Cloth Factory and Tinners' Tool Manufactory. The losses of these factories are quite large, as two of their dams have been carried away and a large amount of goods damaged. The greatest loss will be to the workmen, who are nearly all thrown out of employment while the dams are being rebuilt. The people thus distressed will number several hundred. ORDER LOO CITOS, FRIDA, Jan. 27, 1854.
You must not be too sangaine of the ultimate issue of our Expedition. Enough has already been done, however, to more than compensate for all its expense and trouble. The Japanese will be careful hereafter how they treat strangers who may be thrown among them. And I feel assured that ressels touching at their ports will be thereafter kindly treated and supplied, though perhaps not allowed to communicate with the people. This opinion is founded on what has been done already. How much more may be accomplished on our second visit, now soon to be made, remains to be seen. Our explorations of this and the neighboring islands, and our surveys of the waters of both groups, are destined to beof the waters of both groups, are destined to be-come conspicuous and be made useful in the compercial history and incidents of the next twenty

years.
This island of Great Loo-Choo is one of the most beautiful spots in the world. It has a population of 150,000, at the least. It traces its line of Kings back to the Twelfth Century. The presint King is a minor, and the realm is governed by a Regent. Our Commodors has acquired creat influence over this Government by his dis-blay of force and his conciliatory demeanor; and the Government and people are becoming every day less reserved. And were it not for the nu-merous spies kept upon the island by the Japan-ess Government to watch the acts of the island-ers and to report at Yedo, these despot-ridden and overburdened people would freely open their Our surveys of this island are nearly completed.

Our surveys of this island are nearly completed. The shores and ports of the entire island have been carefully surveyed, and we have found two ports not before known to strangers. We surveyed the Bay of Edd nearly to the city, and shall complete the work on the occasion of our next visit.

We are preparing to sail for Yedo. We have We are preparing to sail for Yedo. We have here three steamers—the Macadonian, Vandalia and Susquehanna; and three store-ships—the Supply. Nour friend, Bayard Taylor, has doubtless safely returned ere this, and given you full accounts of his experience with us. Our Commodore was persuaded to depart from his pre-determined rules to admit no civilian on board the ship, except for some special service, in favor of Mr. Taylor. His modest and unassuming deportment fully justified the Commodore's decision. Mr. Taylor became a great favorite with all, and particularly with the Commodore himself. Of his telents I need not steak. In addition, he was not only a genthe Commodore bimself. Of his talents I need not speak. In addition, he was not only a gentleman but an agreeable companion, and rendered much service to the expedition during his stay. He made many friends in the aquadron, and we were all very sorry to part with him. Since our visit to the Bonin Island, Lord Clarendon has instructed the Governor of Hong-Kong, Slr Geo. Bonham, to inquire of the Commander of our Expedition what his intention is in receiving to those islands, intimating that the

mander of our Expedition what his intention is in regard to those islands, intimating that the sorereignty thereof is vested in the British Crown. Commodore Perry replied, giving Sir George satisfactory proof that the islands were known to the Japanese, Dutch, Spaniards, and Portuguese, more than a century ago, and that the group was visited by Captain Coffie, in the American ship Transit, two or three years before Beechy surveyed and took possession of them in bohalf of his Britannic Majesty.

reyed and took possession of them in behalf of his Britannic Majesty.

The force which had been promised us to bombard the walls of Yedo, and to overrun the Empire of Japan, never has arrived in the China Seas but in part. And even that portion which has rendezvoused here is weakened by the necessity of keeping a vessel at Shanghai, and another at Canton. And what is more provoking, the last mull brought orders from our Government to place one of the remaining steamers at the disposal of our newly appointed Commissioner, Air. McLane, to carry him from port to port. This mode of conveyance is a little expensive, since the consumption of coal alone will cost Uncle Sam eight handred dollars a day while the ship is under steam.

Hon. Luther Severance, (of Mc.), says the Gospel Banner, reached his bome in this city by the cars of Wednesday evening of last week.—
His wife and daughter accompanied him. We passed an hour with him alone on Saturday. Mr. S. is a doomed man; he cannot live, and he knows it; and there is a sort of majesty in the revealed conscieusness of his approaching fate, which already seems to have elevated his soul to lofty heights, and made him kindred to the highest powers of the world to come. Four years ago, when he started from Boston for the Sandwich Island, as Commissioner of the United States to that Kingdom, he took some cald, that produced a slight "cold core" on his upper lip. This never got well, but in the Sandwich Island resulted in a cancer, which was cut out a year ago last December, leaving his mouth in a mutilated shape. The adjacent parts of the under lip are now swollen with new and spreading tumors, and these, indeed, have extended over his chin, amongst the glands of the throat, where the flesh is rotted out and requires constant dressing. It is sad a fright for hourth for a man, and such a

KIDDER'S GAS REGULATOR. Mr. J. L. In this morning's paper will be found a testimonial from citizens of this place who are using the Regulator, and which speaks for itself. See the advertisement.—Chicago Dem. Press.

ARRIVAL OF EXULES.—The bark Nacoochee, from Madeira, which arrived New York on the 26th, brings 155 passengers, who are religious exites bound to the colony in Illinois already established there. "THE BALANCE OF POWER."-In the course of the debate in the House of Commons, which followed the Declaration of War, Mr. J. Basent trongly deprecated the policy of wasting life and power" in Europe. Such an attempt by any nation he thought would defeat its own ends. Mr. BRIGHT is the representative of Manchester, and naturally enough therefore opposed to anything that will affect injuriously English Manufactories,

ing allusions to the United States:—

"He wanted to know what was the balance of power? There was indeed a balance of power that this country might regard, if our statesmen had a little less of those narrow views which they sometimes imputed to himself and those who thought with him. If they could look beyond those old nations of Europe, and cast their eyes as far westward as they looked eastwards, they might there see a power growing up which before long would teach us where the balance of power resided. The struggle might indeed begin with Russia, but it might end with half the Powers of Europe; for Austria and Prussia were just as likely to join Russia as this country, and probably more so; and we know not how long alliances which now appeared very secure might remain to us; for the we know not how long alliances which now appeared very secure might remain to us; for the circumstances in which the Government had involved as were of the most critical character, and the nation stood as it were upon a mine that might explode any day. Give us seven years of this infatuated struggle upon which we had now entered, and let the United States remain at pace during that period, and no one could tell what might then be the relative positions of the loc nations.—

Head they need the property of the Commissioners. then be the relative positions of the two nations.—
Had they read the reports of the Commissioners who had visited the New York Exhibition, with regard to the wonderful progress of that country in tomage, and exports, and imports, and manufactures, and the development of all its resources, and the means of transit? Why, there had been nothing like it under the sun before. They would, no doubt, profit to a large extent by the calamities that might befall us; while we are critangled in a war, our trade will decay and diminish, and our people, suffering and discortented as in all former times of war, will emigrate by increasing our people, supering and discordened in an office of times of war, will emigrate by increasing numbers to a country whose policy it is to keep itself free from the entanglement of European politics—to a country with whom rests the great question whether England shall for any long time retain what she professes to value so muchgreat supremacy in industry and at sea.

We are not a little gratified to perceive the sincere and warm approval with which the independent and manly speech of Hon, Theodore G. Hunt of Louisians, on the Nebraska perfidy has been received by his immediate constituents Their appreciation of its high toned national and honorable sentiments is creditable to their own sense of justice, honor, and right. The New Orleans Bee makes copious extracts, which it heartily endorses, and characterizes the whole speech as a "masterly production," and as "an able and luminous speech" The New Orleans Bulletin is even more explicit in the expression of approval and cordial coincidence of sentiment. It says; In both sentiment and style, it is most credi-

In both sentiment and style, it is most creditable to the honesty, manliness and attainments of its suihor. It is a bold, independent and comprehensive exposition of a subject the most important in its nature, whether considered abstractly or consequentially, that can possibly engage the attention of the representatives of the people in Nation. Legislature. Col. Hunt has treated the subject as an independent national man should do, upon its merits alone, aside from those extrinsic and accidental influences which too often govern public men in the discharge of their public duties. It would be superfluous for us to say that we coincide in sentiment with Col. Hunt upon this subject, and that we fully subscribe to the riews he has taken of it in its details as well as its entirety. Weeks ago we gave free and full expression of our opinious upon the question, deprecating its introduction and discussion as unnecessary, productive, if the bill should pass, of no practical good, but on the contrary calculated to result in mischievous consequences. We have been deceived, the South is in truth indifferent no practical good, out on the contrary cardenary and the to result in mischievous consequences. We have been deceived; the South is, in truth, indifferent to the whole matter; and the effort of the party press to give it importance, to make it a means to arouse the public mind, and make it, in the party elang of the day, a test question, has proved at abortion.

New Man at the Wheel.—Last week, as the steamer Lady Elgin was making her way up the lake with a large load of freight and passengers, among which was a collection of animals for exhibition, the whoelsman suddenly found difficulty in changing the book's course. For, tug and pul, and bear on as much as he would, the wheel would not budge an inch.
"Port helm!" cried the Captain.
"York helm!" cried the Captain.
"But still the helm was "hard a starboard," and the boat was taking a turn in the middle of the lake. The Captain swore, and the mate made for the wheel house. Pushing the man aside, he took hold himself. It was of no use—the mate was to more successful than the wheelsman.
Port helm! for God's sake! Can't you see where the boat is going?" shouted the Captain.
The mate declared that something was the matter of the wheel, as he could not stir it. The biding was perfectly inexplicable. The engine thing was perfectly inexplicable. The engine was stopped, and muster, mate and all hands went see what could be the matter. Mr. Stam, the "elephant" of the menagerie, not liking the roisy rattling of chains overhead, had taken upon himself the responsibility of giving a new turn to affairs. With his trunk wound round

marine in the same way as now in England. The tron ship has not yet been theroughly tested, but so far as experience goes, the results have been most encouraging. The ship Three Bells, lately at this port from the memorable voyage in which she rescued the passengers of the San Froncisco, was an iron ship of between five and six years old, Clyde built, perfectly right in her beams from the day she was launched, apparently as good as ever.

The returns published indicate that our shipbuilding is rapidly surpassing that of Great Britain. Over \$30,000 tons of shipping were built in the United States in 1853, and in still greater amount in 1853. At present the aggregate amount of tunnage owned by each of the two countries of the floor; but whether they carried does not materially vary. The rapid stides our

From the cool and deliberate way these burglaries have been conducted, it is the opinion of many that the robbers are in our vicinity; and if so it is the duty of our citizens to ferret them out, and hand them over to the strong arm of the law, that they may be tried, convicted and safely lodged in the State Prison.—Jeffersonian.

ORIGIN OF THE TERM DOUGHFACE.—At an anti-ORIGIN OF THE TERM DOUGHFACE.—At an antiNebraska meeting held in Delhi, New York,
says the Gazstte of that place, Judge Hathaway,
who was one of the speakers, mentioned an
ancedete showing the origin of the term doughfice, so commonly applied to the northern men
with southern principle. When a young man,
he was presented at an interview between Goneral Root and one Dr. Chris, at that time representing Delaware and Green counties in Congress. Dr. Clark was a supporter of the Missouri Compromise and advocated and voted for
the admission of Missouri into the Union under
that compromise. In the conversation with General Root, he was relating some incidents which
transpired during the debate upon the bill. Dr.
Clark stated, that he addressed the House in
favor of the passage of bill, and, said he, "all the Clark stated, that he addressed the House in favor of the passage of bill, and, said he, "all the time that I was speaking, John Randolph, of Virginia, sat and sneeringly pointed his long, bony finger at me, and made up faces at me, and just as I sat down, he screamed out, in his shrill squeaking voice: 'doughface, 'doughface.' "Judge Hathaway remarked, that this Dr. Clark actually seemed proud of the appellation.

NEW POST OFFICE AT WASHINGTON ISLAND New Post Office at Washington Island, and We learn that a new Post Office is about to be established at Washington Island, and William P. Rarny named for the appointment of Poet Master. This is a measure of the right kind, for the eristence of a Post Office at the point proposed will be a great convenience to a large number of men employed on Washington, St. Martin, and Summer islands, and the lower portion of the neighboring peninsula, who have heretofore been completely isolated in winter, and in summer wholly dependent upon chance opportunities for communication with the main land. During the season of navigation, from six to eight hundred persons live within the territory which this post of fice will greatly accommodate. It is only just to add that the Department have taken this step in compliance with the urgent representation of Mr. ompliance with the urgent representation of Mr.

Report of the Harbor Committee.

The Harbor Committee, in pursuance of a notice duly published for Proposals from Contracproperty in attempts to preserve "the balance of tors, to furnish materials and construct a Harbor at the "Straight Cut," in accordance with the plans and specifications on file in the City Olerk's Daily, Tri-Weekly and Weekly. office, would respectfully Report, that they have received five proposals, as follows, to wit :-- from S. H. Martin and John Boyes, to build Sec. 1 of the work, for \$2,400 00 To build Section 2 35,290 00 or the general peace upon which they depend for the work, for To build Section 2 presperity. Among his remarks were the follow-

F. C. Fearman & Co., to furnish all the atone required for the work, for 7.25 per cord.
Abel Hawley, to build Sections 1, 2 & 3, of the work, for To build Section 4

Mr. Hawley's bid being the lowest, the committee recommend that a contract be entered into by the city with him, to furnish all the materials, nd to construct the whole work-provided, however, in said contract, that the city reserve the right to stop the work finally or temporarily, at the end or completion of the 1st, 2d, and 3d secions; and that said contract be stringently drawn, o as to protect the city, and secure the most perfect and durable work; and, at the same time complete the whole, at the earliest period practicable; and that the payments for the work be made on the estimates, from time to time, by the City Engineer, and in the Bonds of the City, at their par value or face; said Bonds to be payable twenty years from their date, and bearing interest not to exceed 7 per cent per annum; and both principal and interest payable at such place in the city of New York, as may be specified on the face of said Bonds. The Harbor Committee, fully appreciating the

importance and necessity of a safe and capacious Harbor at the port of Milwaukee, which shall afford facilities for our rapidly Increasing commerce and be accessible for all classes of vessels, wheth or seeking our harbor for protection from the elements, or to receive or discharge their cargoes and believing that the private interests of our citizens, as also the general public interests of the city, dictate a policy on the part of the city. in the construction of our harbor, and the improvement of the nevigation of our river, which shall afford a safe and easy ingress and egress for vessels and steamers, and shall encourage all to abandon the outside, or pier landing, now used of necessity, and to seek docks and landing facilities incide-more in the business portion of the town, and alike advantageous to the commerce of the city, and the interests of vessels and steamers, would therefore recommend the adoption of the following resolution, as an expression of the poli-cy and intention of the City and Council, in our harbor and river improvements-to wit:

Resolved. That it is, and is hereby declared to be the policy and the intention of the city, what-ever the action of the same may be, through the Common Council, in the construction of the Har-Common Council, in the construction of the Harbor at the "Straight Cut," or the improvement of the navigation of the Milwaukee rice, to keep open the present channel between the outer and the Government piers and the Straight Cut, and to make, by dredging, as soon as possible, the water twelve feet deep between the established dock lines on the Milwaukee river, from the outer ends of the Government piers, to Cherry street Bridge.

The people, the Senators, and Representative from
the South should have appreciated and remembered these sacrifices, made in a spirit of concession,
and for the purpose of preserving the anicable
and fraternal relations between the slave and free
States; and they should have spurned alike the

Dr. Urban's Vegetable Fever and AGURPATION

The only sure remedy our war sort for Chills and Fever, on warranted to care, in all cases, if taken according to directions.

The only sever searchy ever settlement of this and rever, as exerrented to care, in all cases, if taken according to directions.

It cures, when taken according to directions, in TWENTY MINUTES, leaving no Fever after the Chill; very soldon requiring more tann ONE DOSE to make a FERMANENT CURE. A great number of cases, from two to five years at and high parts been cure the child his never, as yet, returned. The beauty of this medicine is, that it stops the Chill in TWENTY MINUTES, or less, and the patient will be entirely clear from Fever after the Chill, which is not the case when any other medicine is tased. It has superseeded all other preparations when you then been introduced.

Read what the Editors of the Louisville Democrat say from their own observation:

"Dr Urban's medicine for the cure of chills and fever has effected some wondorful cures in our own midst. A young man who has resided for several years in Louisians, reached New Albany a few works since, weak and emandated—little and fover. He made a short stay at the bouse of Judge Smith, where his old disease continued with no less severity than at home in Louisians. Having exhausted aimost every remody known to the medical profession, he procured a low of Urban's celebrated medicine, and after taking a woodwars was entirely releved and restored to health the has been well ever since—says his health ofter Laking a good for several years and his low fast regarding his former vigor and the roay cheeks lie namentate, every low of the Tables and creati.

Mexican Mustang Liniment.

DURHANVILLE, N. Y., December 12, 1891.

Messrs. Brass & Co.:—
Gerrs:—Although a stranger to you, I am not to your most valuable medicine called Mexican Mustang Liniment. One year ago, I became shirted with an eelargement of my knee Joint; also a weakness which disabled mo almost from using my limbs at all. I called on a physician in Syncuso—(the name could be given)—he examined it and took me to bathe it with warm water, and rub it two or three times a day, and it might go off without much trouble if not, to call sgain. Some weeks passed, and it grow no better. I then called on another doctor at Oncida Depot; be told me nothing would help it but blistering and knoting. I could not consent to this, and called on Dra. C. A.T.; they give me a mixture of indigo, calomet, &c. I tried this and it did no good. I then used five or six dollars worth of a limiment that had hear recommended to me. All of those medicines I have been using for the fast tou months; therough, and according to directions, without the least possible good resulting from it. I then obtained some of your Mexican Mustang Limiment; the first bottle, a 25 caut size, I perceived straightened my joint. I am now using my fourth bottle, and my knee is nearly wall.
